Desktop Virtualization

Thin, Zero and Smart Clients

To ease the transition away from the PC, and into the cloud, ViewSonic has leveraged its 25 years of expertise to complement today's (and tomorrow's) post-PC world. ViewSonic offers a complete line of cloud-enabled thin, zero and smart clients that are optimized for each of the most popular VDI solutions. With ViewSonic's complete line, you can quickly and easily deploy virtual desktops across your entire enterprise.

Quick and Easy Deployment

All of our thin and zero client solutions can be deployed and provisioned in minutes, and can be easily scaled to thousands of users.

Lower TCO

Easier and faster deployment, simplified management, and increased reliability and security lead to a lower cost of ownership. In addition, pair any of our thin and zero clients with a ViewSonic LED monitor and consume less than 30W of power as compared to 150W for a typical PC.

Compact Form Factor

With an ultra-slim 0.6L form factor that fits in the palm of your hand, and easily attaches to any VESA-ready monitor, our thin and zero clients save space without sacrificing performance.

Flexible Desktop Virtualization

ViewSonic's thin and zero clients are optimized for each of the most popular virtualization solutions (including Citrix, VMware, and Microsoft RDP with RemoteFX).

Only ViewSonic Offers Operating System Flexibility

ViewSonic is the only partner offering your choice of VDI solutions that support Linux, Windows and Android.

Dual Display Productivity

With dual video outputs, ViewSonic's thin and zero clients and integrated zero client displays are optimized for two 1080p displays for increased productivity.

Smart Display Clients

- ▶ Perfect for businesses looking for a cost-effective solution for their virtual desktop needs.
- ▶ Equipped with Texas Instruments® ARM or NVIDIA® Tegra™ CPU.
- ▶ Preinstalled with Citrix® XenMobile™ and Worx Home to leverage your mobile management initiatives on the desktop.

Thin Clients

- ▶ Well-suited for intensive 2D and 3D graphics-based applications.
- ▶ Features a powerful Intel® Atom™ CPU for true PC-like performance.
- ▶ Optimized for Citrix® ICA/HDX, VMware® PCoIP®, and Microsoft® RemoteFX®—making it a versatile virtualization solution with endless possibilities.

Zero Clients

- ▶ A Teradici® 2321 processor and support for hardware accelerated PCoIP enable blazing-fast response times.
- ▶ True zero clients featuring no local memory or moving parts for the ultimate in energy savings and reliability.
- ▶ VMware® Horizon View™ certified

Integrated Zero Client Displays

- ▶ Full HD LED displays with integrated Teradici 2321 processors and support for hardware accelerated PCoIP enable blazing-fast response times.
- ▶ The combination of an energy efficient LED screen, and integrated zero client provides the lowest possible TCO and all-in-one design for clutter-free desktop.
- ▶ VMware Horizon View certified
